## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Officer's Responsibilities and Approval**

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the consolidated financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the consolidated financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the consolidated financial statements and was given unrestricted access to all financial records and related data.

The consolidated financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any Interpretations, guidelines and directives issued by the Accounting Standards Board.

The consolidated financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that he is ultimately responsible for the system of internal financial control established by the economic entity and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, the accounting officer sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the economic entity and all employees are required to maintain the highest ethical standards in ensuring the economic entity's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the economic entity is on identifying, assessing, managing and monitoring all known forms of risk across the economic entity. While operating risk cannot be fully eliminated, the economic entity endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

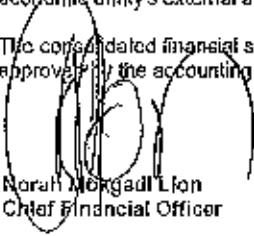

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the consolidated financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the economic entity's cash flow forecast for the year to 30 June 2016 and, in the light of this review and the current financial position, he is satisfied that the economic entity has or has access to adequate resources to continue in operational existence for the foreseeable future.

The consolidated financial statements are prepared on the basis that the municipality is a going concern and that the Greater Tzaneen Municipality has neither the intention nor the need to liquidate or curtail materially the scale of the municipality.

Although the accounting officer are primarily responsible for the financial affairs of the municipality, they are supported by the economic entity's external auditors.

The consolidated financial statements set out on pages 8 to 93, which have been prepared on the going concern basis, were approved by the accounting officer on 30 September 2015 and were signed on its behalf by:

  
Norah Mergadilion  
Chief Financial Officer

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Officer's Report**

The accounting officer submits his report for the year ended 30 June 2015.

#### **1. Review of activities**

##### **Main business and operations**

The Greater Tzaneen Municipality is situated in the eastern quadrant of the Limpopo Province within the Mogalakwena District Municipality Area of Jurisdiction. It comprises a land area of approximately 3240 km<sup>2</sup>, and extends from Haenertsburg in the West, to Rubborvlei in the East (85km), and just South of Modjadji Skloof in the North, to Trichardtsdal in the South, (47 km).

The operating results for the year were satisfactory for the following reasons:

##### **Financial review**

This review highlights the Municipality's performance for the past year but does not in any way attempt to provide detail of the performance. Full detail appear in the annual financial statements.

##### **Overview of the Municipality's Results;**

The main revenue sources of the Municipality are:

- Property rates;
- Service charges and
- Government grants and subsidies

Whilst the highest expenditure items are:

- Employee related costs;
- Bulk purchases and
- Repairs and maintenance

Council has embarked on implementing a range of revenue collecting strategies to optimise the collection of debt owned by consumers. Furthermore, Council undertook a billing data cleanup exercise which yielded good results.

With regards to expenditure management the cost containment measures approved by Cabinet on 23 October 2013 have been introduced through the 2014/2015 budget process and will be complied with.

Net surplus of the Municipality was R 28 174 819 (2014: surplus R 138 472 450).

#### **2. Going concern**

The consolidated financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officer continue to procure funding for the ongoing operations for the municipality.

#### **3. Subsequent events**

The accounting officer is not aware of any matter or circumstance arising since the end of the financial year.

#### **4. Accounting Officer**

The accounting officer of the municipality at the date of this report is as follows:

Name	Nationality
Selemo Republic Monakedi	South African

#### **5. Auditors**

Auditor General of South Africa will continue in office for the next financial period.

## Greater Tzaneen Municipality

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Policies**

---

#### **1. Basis of preparation**

The consolidated financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

These consolidated financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention as the basis of measurement, unless specified otherwise.

Assets, liabilities, revenues and expenses were not offset, except where offsetting is either required or permitted by a Standard of GRAP.

A summary of the significant accounting policies, which have been consistently applied in the preparation of these consolidated financial statements, are disclosed below.

These accounting policies are consistent with the previous period, unless explicitly stated otherwise.

#### **1.1 Presentation currency**

These consolidated financial statements are presented in South African Rand, which is the functional currency of the economic entity.

#### **1.2 Going concern assumption**

These consolidated financial statements have been prepared based on the expectation that the economic entity will continue to operate as a going concern for at least 12 months.

#### **1.3 Consolidation**

##### **Basis of consolidation**

Consolidated financial statements are the financial statements of the economic entity presented as those of a single entity.

The consolidated financial statements incorporate the financial statements of the controlling entity and all controlled entity.

Control exists when the controlling entity has the power to govern the financial and operating policies of another entity so as to obtain benefits from its activities.

The results of controlled entities, are included in the consolidated financial statements from the effective date of acquisition or date when control commences to the effective date of disposal or date when control ceases.

The financial statements of the controlling entity and its controlled entities used in the preparation of the consolidated financial statements are prepared as of the same reporting date.

Adjustments are made when necessary to the financial statements of the controlled entities to bring their accounting policies in line with those of the controlling entity.

All intra-entity transactions, balances, revenues and expenses are eliminated in full on consolidation.

#### **1.4 Significant judgements and sources of estimation uncertainty**

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the amounts represented in the consolidated financial statements and related disclosures. Use of available information and the application of judgement is inherent in the formation of estimates. Actual results in the future could differ from these estimates which may be material to the consolidated financial statements. Significant judgements include:

##### **Trade receivables and loans and receivables**

The economic entity assesses its trade receivables and loans and receivables for impairment at the end of each reporting period. In determining whether an impairment loss should be recorded in surplus or deficit, the surplus makes judgements as to whether there is observable data indicating a measurable decrease in the estimated future cash flows from a financial asset.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Policies**

---

#### **1.4 Significant judgements and sources of estimation uncertainty (continued)**

The impairment for trade receivables and loans and receivables is calculated on a portfolio basis, based on historical loss ratios, adjusted for national and industry-specific economic conditions and other indicators present at the reporting date that correlate with defaults on the portfolio. These annual loss ratios are applied to loan balances in the portfolio and scaled to the estimated loss emergence period.

#### **Allowance for slow moving, damaged and obsolete stock**

An allowance for stock to write stock down to the lower of cost or net realisable value. Management have made estimates of the selling price and direct cost to sell on certain inventory items. The write down is included in the operation surplus note.

#### **Fair value estimation**

The fair value of financial instruments traded in active markets (such as trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the economic entity is the current bid price.

The carrying value less impairment provision of trade receivables and payables are assumed to approximate their fair values. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the economic entity for similar financial instruments.

#### **Impairment testing**

The recoverable amounts of cash-generating units and individual assets have been determined based on the higher of value-in-use calculations and fair values less costs to sell. These calculations require the use of estimates and assumptions.

The economic entity reviews and tests the carrying value of assets when events or changes in circumstances suggest that the carrying amount may not be recoverable. Assets are grouped at the lowest level for which identifiable cash flows are largely independent of cash flows of other assets and liabilities. If there are indications that impairment may have occurred, estimates are prepared of expected future cash flows for each group of assets. Expected future cash flows used to determine the value in use of goodwill and tangible assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including production estimates, supply demand, together with economic factors such as inflation, interest and economic conditions.

#### **Provisions**

Provisions were raised and management determined an estimate based on the information available. Additional disclosure of these estimates of provisions are included in note 19 - Provisions.

#### **Post retirement benefits**

The present value of the post retirement obligation depends on a number of factors that are determined on an actuarial basis using a number of assumptions. The assumptions used in determining the net cost (income) include the discount rate. Any changes in these assumptions will impact on the carrying amount of post retirement obligations.

Other key assumptions for pension obligations are based on current market conditions. Additional information is disclosed in Note 20.

#### **Effective interest rate**

The economic entity used the prime interest rate to discount future cash flows.

#### **Allowance for doubtful debts**

On debtors an impairment loss is recognised in surplus and deficit when there is objective evidence that it is impaired. The impairment is measured as the difference between the debtors carrying amount and the present value of estimated future cash flows discounted at the effective interest rate, compiled at initial recognition.

#### **1.5 Investment property**

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2016

### **Accounting Policies**

#### **1.5 Investment property (continued)**

- use in the production or supply of goods or services or for administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes.

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the economic entity, and the cost or fair value of the investment property can be measured reliably.

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired through a non-exchange transaction, its cost is its fair value as at the date of acquisition.

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

#### **Fair value**

Subsequent to initial measurement investment property is measured at fair value.

The fair value of investment property reflects market conditions at the reporting date.

A gain or loss arising from a change in fair value is included in net surplus or deficit for the period in which it arises.

If the municipality determines that the fair value of an investment property under construction is not reliably determinable but expects the fair value of the property to be reliably measurable when construction is complete, it measures that investment property under construction at cost until either its fair value becomes reliably determinable or construction is completed (whichever is earlier). If the economic entity determines that the fair value of an investment property (other than an investment property under construction) is not reliably determinable on a continuing basis, the economic entity measures that investment property using the cost model (as per the accounting policy on Property, plant and equipment). The residual value of the investment property is then assumed to be zero. The economic entity applies the cost model (as per the accounting policy on Property, plant and equipment) until disposal of the investment property.

Once the municipality becomes able to measure reliably the fair value of an investment property under construction that has previously been measured at cost, it measures that property at its fair value. Once construction of that property is complete, it is presumed that fair value can be measured reliably. If this is not the case, the property is accounted for using the cost model in accordance with the accounting policy on Property, plant and equipment.

#### **Derecognition**

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal.

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable.

#### **1.6 Property, plant and equipment**

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one period.

#### **Recognition**

The cost of an item of property, plant and equipment is recognised as an asset when:

- it is probable that future economic benefits or service potential associated with the item will flow to the economic entity; and
- the cost of the item can be measured reliably

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Policies**

#### **1.8 Property, plant and equipment (continued)**

##### **Initial measurement**

Property, plant and equipment is initially measured at cost.

The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Trade discounts and rebates are deducted in arriving at the cost.

Where an asset is acquired through a non-exchange transaction, its cost is its fair value as at date of acquisition.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Costs include costs incurred initially to acquire or construct an item of property, plant and equipment and costs incurred subsequently to add to, replace part of, or service it. If a replacement cost is recognised in the carrying amount of an item of property, plant and equipment, the carrying amount of the replaced part is derecognised.

Recognition of costs in the carrying amount of an item of property, plant and equipment ceases when the item is in the location and condition necessary for it to be capable of operating in the manner intended by management.

Major spare parts and stand by equipment which are expected to be used for more than one period are included in property, plant and equipment. In addition, spare parts and stand by equipment which can only be used in connection with an item of property, plant and equipment are accounted for as property, plant and equipment.

Major inspection costs which are a condition of continuing use of an item of property, plant and equipment and which meet the recognition criteria above are included as a replacement in the cost of the item of property, plant and equipment. Any remaining inspection costs from the previous inspection are derecognised.

##### **Subsequent measurement**

Property, plant and equipment are depreciated on the straight line basis over their expected useful lives to their estimated residual value.

Property, plant and equipment is carried at cost less accumulated depreciation and any impairment losses.

The useful lives of items of property, plant and equipment have been assessed as follows:

Item	Depreciation method	Average useful life
Furniture and fixtures	Straight line	7
Office equipment	Straight line	3
IT equipment	Straight line	3
Infrastructure	Straight line	
▪ Roads and paving		10 - 30
▪ Pedestrian malls		20
▪ Electricity		10 - 30
▪ Water		15 - 20
▪ Sewerage		15 - 20
▪ Housing		30
Community	Straight line	
▪ Improvements		30
▪ Recreational facilities		20
▪ Security		3 - 5
Other assets	Straight line	
▪ Buildings		30
▪ Specialist vehicles		20
▪ Other vehicles		5 - 7

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Policies**

#### **1.6 Property, plant and equipment (continued)**

Office equipment	3 - 5
Furniture and fittings	7 - 10
Watercraft	15
Bins and containers	5 - 10
Specialised plant and equipment	6 - 15
Other items of plant and equipment	5

The residual value, and the useful life and depreciation method of each asset are reviewed at the end of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

#### **Derecognition**

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset.

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

#### **1.7 Intangible assets**

An asset is identifiable if it either:

- is separable, i.e. is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, identifiable asset or liability, regardless of whether the entity intends to do so; or
- arises from binding arrangements (including rights from contracts), regardless of whether those rights are transferable or separable from the economic entity or from other rights and obligations.

A binding arrangement describes an arrangement that confers similar rights and obligations on the parties to it as if it were in the form of a contract.

#### **Recognition**

An intangible asset is recognised when:

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the economic entity; and
- the cost or fair value of the asset can be measured reliably.

The economic entity assesses the probability of expected future economic benefits or service potential using reasonable and supportable assumptions that represent management's best estimate of the set of economic conditions that will exist over the useful life of the asset.

#### **Initial measurement**

Where an intangible asset is acquired through a non-exchange transaction, its initial cost at the date of acquisition is measured at its fair value as at that date.

#### **Subsequent measurement**

Intangible assets are carried at cost less any accumulated amortisation and any impairment losses.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Policies**

#### **1.7 Intangible assets (continued)**

Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

Item	Useful life
Computer software	3 - 5 years
Website development	5 years

#### **Derecognition**

Intangible assets are derecognised:

- on disposal; or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss is the difference between the net disposal proceeds, if any, and the carrying amount. It is recognised in surplus or deficit when the asset is derecognised.

#### **1.8 Financial instruments**

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or a residual interest of another entity.

The amortised cost of a financial asset or financial liability is the amount at which the financial asset or financial liability is measured at initial recognition minus principal repayments, plus or minus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, and minus any reduction (directly or through the use of an allowance account) for impairment or uncollectability.

Derecognition is the removal of a previously recognised financial asset or financial liability from an entity's statement of financial position.

The effective interest method is a method of calculating the amortised cost of a financial asset or a financial liability (or group of financial assets or financial liabilities) and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the effective interest rate, an entity shall estimate cash flows considering all contractual terms of the financial instrument (for example, prepayment, call and similar options) but shall not consider future credit losses. The calculation includes all fees and points paid or received between parties to the contract that are an integral part of the effective interest rate (see the Standard of GRAP on Revenue from Exchange Transactions), transaction costs, and all other premiums or discounts. There is a presumption that the cash flows and the expected life of a group of similar financial instruments can be estimated reliably. However, in those rare cases when it is not possible to reliably estimate the cash flows or the expected life of a financial instrument (or group of financial instruments), the entity shall use the contractual cash flows over the full contractual term of the financial instrument (or group of financial instruments).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable willing parties in an arm's length transaction.

A financial asset is:

- cash;
- a residual interest of another entity; or
- a contractual right to:
  - receive cash or another financial asset from another entity; or
  - exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity.

A financial liability is any liability that is a contractual obligation to:

- deliver cash or another financial asset to another entity; or
- exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the entity.

#### **Classification**

The municipality has the following types of financial assets (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

## Greater Tzaneen Municipality

Consolidated Financial Statements for the year ended 30 June 2015

### Accounting Policies

#### 1.8 Financial Instruments (continued)

Class	Category
Consumer debtors	Financial asset measured at amortised cost
Receivables from exchange transactions	Financial asset measured at amortised cost
Cash and cash equivalents	Financial asset measured at amortised cost
Other financial assets	Financial asset measured at fair value

The municipality has the following types of financial liabilities (classes and category) as reflected on the face of the statement of financial position or in the notes thereto:

Class	Category
Other financial liabilities	Financial liability measured at amortised cost
Finance lease obligations	Financial liability measured at amortised cost
Payables from exchange transactions	Financial liability measured at amortised cost
Consumer deposits	Financial liability measured at amortised cost

#### Initial recognition

The municipality recognises a financial asset or a financial liability in its statement of financial position when the municipality becomes a party to the contractual provisions of the instrument.

The municipality recognises financial assets using trade date accounting.

#### Initial measurement of financial assets and financial liabilities

The municipality measures a financial asset and financial liability initially at its fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

#### Subsequent measurement of financial assets and financial liabilities

The municipality measures all financial assets and financial liabilities after initial recognition using the following categories:

- Financial instruments at fair value.
- Financial instruments at amortised cost.
- Financial instruments at cost.

All financial assets measured at amortised cost, or cost, are subject to an impairment review.

#### Fair value measurement considerations

The best evidence of fair value is quoted prices in an active market. If the market for a financial instrument is not active, the municipality establishes fair value by using a valuation technique. The objective of using a valuation technique is to establish what the transaction price would have been on the measurement date in an arm's length exchange motivated by normal operating considerations. Valuation techniques include using recent arm's length market transactions between knowledgeable, willing parties, if available, reference to the current fair value of another instrument that is substantially the same, discounted cash flow analysis and option pricing models. If there is a valuation technique commonly used by market participants to price the instrument and that technique has been demonstrated to provide reliable estimates of prices obtained in actual market transactions, the entity uses that technique. The chosen valuation technique makes maximum use of market inputs and relies as little as possible on entity-specific inputs. It incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments. Periodically, a company entity calibrates the valuation technique and tests it for validity using prices from any observable current market transactions in the same instrument (i.e. without modification or repackaging) or based on any available observable market data.

#### Reclassification

The municipality does not reclassify a financial instrument while it is issued or held unless it is:

- a combined instrument that is required to be measured at fair value; or
- an investment in a residual interest that meets the requirements for reclassification.

If fair value can no longer be measured reliably for an investment in a residual interest measured at fair value, the municipality reclassifies the investment from fair value to cost. The carrying amount at the date that fair value is no longer available becomes the cost.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Policies**

---

#### **1.8 Financial instruments (continued)**

If a reliable measure becomes available for an investment in a residual interest for which a measure was previously not available, and the instrument would have been required to be measured at fair value, the entity reclassifies the instrument from cost to fair value.

#### **Gains and losses**

A gain or loss arising from a change in the fair value of a financial asset or financial liability measured at fair value is recognised in surplus or deficit.

For financial assets and financial liabilities measured at amortised cost or cost, a gain or loss is recognised in surplus or deficit when the financial asset or financial liability is derecognised or impaired, or through the amortisation process.

#### **Impairment and uncollectability of financial assets**

The municipality assess at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired.

##### **Financial assets measured at amortised cost:**

If there is objective evidence that an impairment loss on financial assets measured at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate. The carrying amount of the asset is reduced directly. The amount of the loss is recognised in surplus or deficit.

If, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed directly OR by adjusting an allowance account. The reversal does not result in a carrying amount of the financial asset that exceeds what the amortised cost would have been had the impairment not been recognised at the date the impairment is reversed. The amount of the reversal is recognised in surplus or deficit.

##### **Financial assets measured at cost:**

If there is objective evidence that an impairment loss has been incurred on an investment in a residual interest that is not measured at fair value because its fair value cannot be measured reliably, the amount of the impairment loss is measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

#### **Derecognition**

##### **Financial assets**

The municipality derecognises financial assets using trade date accounting.

The municipality recognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the municipality transfers to another party substantially all of the risks and rewards of ownership of the financial asset; or
- the municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the other party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer. In this case, the municipality:
  - derecognise the asset; and
  - recognise separately any rights and obligations created or retained in the transfer.

The carrying amounts of the transferred asset are allocated between the rights or obligations retained and those transferred on the basis of their relative fair values at the transfer date. Newly created rights and obligations are measured at their fair values at that date. Any difference between the consideration received and the amounts recognised and derecognised is recognised in surplus or deficit in the period of the transfer.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Policies**

---

#### **1.8 Financial Instruments (continued)**

If the municipality transfers a financial asset in a transfer that qualifies for derecognition in its entirety and retains the right to service the financial asset for a fee, it recognises either a servicing asset or a servicing liability for that servicing contract. If the fee to be received is not expected to compensate the entity adequately for performing the servicing, a servicing liability for the servicing obligation is recognised at its fair value. If the fee to be received is expected to be more than adequate compensation for the servicing, a servicing asset is recognised for the servicing right at an amount determined on the basis of an allocation of the carrying amount of the larger financial asset.

If, as a result of a transfer, a financial asset is derecognised in its entirety but the transfer results in the entity obtaining a new financial asset or assuming a new financial liability, or a servicing liability, the entity recognise the new financial asset, financial liability or servicing liability at fair value.

On derecognition of a financial asset in its entirety, the difference between the carrying amount and the sum of the consideration received is recognised in surplus or deficit.

If the transferred asset is part of a larger financial asset and the part transferred qualifies for derecognition in its entirety, the previous carrying amount of the larger financial asset is allocated between the part that continues to be recognised and the part that is derecognised, based on the relative fair values of those parts, on the date of the transfer. For this purpose, a retained servicing asset is treated as a part that continues to be recognised. The difference between the carrying amount allocated to the part derecognised and the sum of the consideration received for the part (derecognised) is recognised in surplus or deficit.

If a transfer does not result in derecognition because the municipality has retained substantially all the risks and rewards of ownership of the transferred asset, the municipality continues to recognise the transferred asset in its entirety and recognise a financial liability for the consideration received. In subsequent periods, the municipality recognises any revenue on the transferred asset and any expense incurred on the financial liability. Neither the asset, and the associated liability nor the revenue, and the associated expenses are offset.

#### **Financial liabilities**

The municipality removes a financial liability (or a part of a financial liability) from its statement of financial position when it is extinguished — i.e. when the obligation specified in the contract is discharged, cancelled, expires or waived.

An exchange between an existing borrower and lender of debt instruments with substantially different terms is accounted for as having extinguished the original financial liability and a new financial liability is recognised. Similarly, a substantial modification of the terms of an existing financial liability or a part of it is accounted for as having extinguished the original financial liability and having recognised a new financial liability.

The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognised in surplus or deficit. Any liabilities that are waived, forgiven or assumed by another entity by way of a non-exchange transaction are accounted for in accordance with the Standard of GRAP on Revenue from Non-exchange Transactions (Taxes and Transfers).

#### **Presentation**

Interest relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Dividends or similar distributions relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

Losses and gains relating to a financial instrument or a component that is a financial liability is recognised as revenue or expense in surplus or deficit.

A financial asset and a financial liability are only offset and the net amount presented in the statement of financial position when the municipality currently has a legally enforceable right to set off the recognised amounts and intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

In accounting for a transfer of a financial asset that does not qualify for derecognition, the municipality does not offset the transferred asset and the associated liability.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Policies**

#### **1.9 Tax**

##### **Current tax assets and liabilities**

Current taxes are measured at the amount expected to be paid to South African Revenue Service, using the tax rate and tax laws that have been enacted by the reporting date. An entity will recognise an asset in respect of taxes when the taxable event occurs and the asset recognition criteria have been met.

##### **Deferred tax assets and liabilities**

Deferred taxes are accounted for under the statement of financial position using the liability method, in terms of which:

Deferred tax is measured using the tax rate that is expected to apply to the period when the liability is settled (or the asset is recovered), based on the tax rate and tax laws that have been enacted or substantively enacted by reporting date. In addition, the measurement of deferred tax reflects the tax consequences that would follow from the expected manner of recovery or settlement of the relevant assets and liabilities.

##### **Deferred tax assets**

A deferred tax asset is recognised only when it is probable that sufficient taxable income will be available in future against which the asset can be recovered; and are reviewed at each reporting date, and, if necessary, impairment write-downs or reversals are recognised.

#### **1.10 Leases**

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

When a lease includes both land and buildings elements, the entity assesses the classification of each element separately.

##### **Finance leases - lessee**

Finance leases are recognised as assets and liabilities in the statement of financial position at amounts equal to the fair value of the leased property or, if lower, the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation.

The discount rate used in calculating the present value of the minimum lease payments is the municipality's incremental borrowing rate.

Minimum lease payments are apportioned between the finance charge and reduction of the outstanding liability. The finance charge is allocated to each period during the lease term so as to produce a constant periodic rate of on the remaining balance of the liability.

Any contingent rents are expensed in the period in which they are incurred.

##### **Operating leases - lessor**

Operating lease revenue is recognised as revenue on a straight-line basis over the lease term.

Initial direct costs incurred in negotiating and arranging operating leases are added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease revenue.

The aggregate cost of incentives is recognised as a reduction of rental revenue over the lease term on a straight-line basis.

The aggregate benefit of incentives is recognised as a reduction of rental expense over the lease term on a straight-line basis.

Income for leases is disclosed under revenue in statement of financial performance.

##### **Operating leases - lessee**

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

## **Accounting Policies**

### **1.11 Inventories**

Inventories consist of raw materials, work in progress, consumables and finished goods, which are valued at the lower of cost, determined on the first in, first out method. Where it is held for distribution or consumption at no charge or for a nominal amount, inventories are valued at cost.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Redundant and slow moving inventories are identified and written down with regard to their cost. Consumables are written down according to their age, condition and utility.

Stocks available for sale during the next 12 months are recognised as inventory.

### **1.12 Impairment of cash-generating assets**

Cash-generating assets are those assets held by the economic entity with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

#### **Identification**

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

The economic entity assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, the economic entity estimates the recoverable amount of the asset.

#### **Value in use**

Value in use of a cash-generating asset is the present value of the estimated future cash flows expected to be derived from the continuing use of an asset and from its disposal at the end of its useful life.

When estimating the value in use of an asset, the economic entity estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and the economic entity applies the appropriate discount rate to those future cash flows.

#### **Basis for estimates of future cash flows**

In measuring value in use the economic entity:

- base cash flow projections on reasonable and supportable assumptions that represent management's best estimate of the range of economic conditions that will exist over the remaining useful life of the asset. Greater weight is given to external evidence;
- base cash flow projections on the most recent approved financial budgets/forecasts, but exclude any estimated future cash inflows or outflows expected to arise from future restructuring's or from improving or enhancing the asset's performance. Projections based on these budgets/forecasts covers a maximum period of five years, unless a longer period can be justified; and
- estimate cash flow projections beyond the period covered by the most recent budgets/forecasts by extrapolating the projections based on the budgets/forecasts using a steady or declining growth rate for subsequent years, unless an increasing rate can be justified. This growth rate does not exceed the long-term average growth rate for the products, industries, or country or countries in which the entity operates, or for the market in which the asset is traded, unless a higher rate can be justified.

#### **Composition of estimates of future cash flows**

Estimates of future cash flows include:

- projections of cash inflows from the continuing use of the asset;
- projections of cash outflows that are necessarily incurred to generate the cash inflows from continuing use of the asset (including cash outflows to prepare the asset for use) and can be directly attributed, or allocated on a reasonable and consistent basis, to the asset; and
- net cash flows, if any, to be received (or paid) for the disposal of the asset at the end of its useful life.

Estimates of future cash flows exclude:

- cash inflows or outflows from financing activities; and
- income tax receipts or payments.

**Greater Tzaneen Municipality**  
Consolidated Financial Statements for the year ended 30 June 2015

## **Accounting Policies**

---

### **1.12 Impairment of cash-generating assets (continued)**

The estimate of net cash flows to be received (or paid) for the disposal of an asset at the end of its useful life is the amount that the economic entity expects to obtain from the disposal of the asset in an arm's length transaction between knowledgeable, willing parties, after deducting the estimated costs of disposal.

#### **Discount rate**

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money, represented by the current risk-free rate of interest and the risks specific to the asset for which the future cash flow estimates have not been adjusted.

#### **Recognition and measurement (individual asset)**

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the cash-generating asset to which it relates, the economic entity recognises a liability only to the extent that is a requirement in the Standard or GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

#### **Cash-generating units**

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, the economic entity determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, the economic entity uses management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and
- the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

The carrying amount of a cash-generating unit is determined on a basis consistent with the way the recoverable amount of the cash-generating unit is determined.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

In allocating an impairment loss, the entity does not reduce the carrying amount of an asset below the highest of:

- its fair value less costs to sell (if determinable);
- its value in use (if determinable); and
- zero.

The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other cash-generating assets of the unit.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Policies**

#### **1.12 Impairment of cash-generating assets (continued)**

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

##### **Reversal of impairment loss**

The economic entity assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, the entity estimates the recoverable amount of that asset.

An impairment loss recognised in prior periods for a cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the cash-generating asset is adjusted in future periods to allocate the cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

A reversal of an impairment loss for a cash-generating unit is allocated to the cash-generating assets of the unit pro rata with the carrying amounts of those assets. These increases in carrying amounts are treated as reversals of impairment losses for individual assets. No part of the amount of such a reversal is allocated to a non-cash-generating asset contributing service potential to a cash-generating unit.

In allocating a reversal of an impairment loss for a cash-generating unit, the carrying amount of an asset is not increased above the lower of:

- its recoverable amount (if determinable); and
- the carrying amount that would have been determined (net of amortisation or depreciation) had no impairment loss been recognised for the asset in prior periods.

The amount of the reversal of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit.

##### **Redesignation**

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

#### **1.13 Impairment of non-cash-generating assets**

Non-cash-generating assets are assets other than cash-generating assets.

##### **Identification**

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The economic entity assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the economic entity estimates the recoverable service amount of the asset.

##### **Value in use**

Value in use of non-cash-generating assets is the present value of the non-cash-generating assets remaining service potential.

The present value of the remaining service potential of a non-cash-generating assets is determined using the following approach:

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Policies**

#### **1.13 Impairment of non-cash-generating assets (continued)**

##### **Depreciated replacement cost approach**

The present value of the remaining service potential of a non-cash-generating asset is determined as the depreciated replacement cost of the asset. The replacement cost of an asset is the cost to replace the asset's gross service potential. This cost is depreciated to reflect the asset in its used condition. An asset may be replaced either through reproduction (replication) of the existing asset or through replacement of its gross service potential. The depreciated replacement cost is measured as the reproduction or replacement cost of the asset, whichever is lower, less accumulated depreciation calculated on the basis of such cost, to reflect the already consumed or expired service potential of the asset.

The replacement cost and reproduction cost of an asset is determined on an "optimised" basis. The rationale is that the economic entity would not replace or reproduce the asset with a like asset if the asset to be replaced or reproduced is an overdesigned or overcapacity asset. Overdesigned assets contain features which are unnecessary for the goods or services the asset provides. Overcapacity assets are assets that have a greater capacity than is necessary to meet the demand for goods or services the asset provides. The determination of the replacement cost or reproduction cost of an asset on an optimised basis thus reflects the service potential required of the asset.

##### **Recognition and measurement**

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss.

An impairment loss is recognised immediately in surplus or deficit.

Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

When the amount estimated for an impairment loss is greater than the carrying amount of the non-cash-generating asset to which it relates, the economic entity recognises a liability only to the extent that is a requirement in the Standards of GRAP.

After the recognition of an impairment loss, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

##### **Reversal of an impairment loss**

The economic entity assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the economic entity estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

##### **Redesignation**

The redesignation of assets from a cash-generating asset to a non-cash-generating asset or from a non-cash-generating asset to a cash-generating asset only occur when there is clear evidence that such a redesignation is appropriate.

#### **1.14 Share capital / contributed capital**

An equity instrument is any contract that evidences a residual interest in the assets of an economic entity after deducting all of its liabilities.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Policies**

#### **1.16 Employee benefits**

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

#### **Short-term employee benefits**

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee's service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid, if the amount already paid exceeds the undiscounted amount of the benefit, the entity recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefit in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The economic entity recognise the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

#### **Post-employment benefits**

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

#### **Multi-employer and State plans**

The municipality classifies a multi-employer plan and/or state plans and/or composite social security programmes as a defined contribution plan or a defined benefit plan under the terms of the plan (including any constructive obligation that goes beyond the formal terms).

Where a plan is a defined contribution plan, the municipality accounts for it in the same way as for any other defined contribution plan.

Where a plan is a defined benefit plan, the municipality account for its proportionate share of the defined benefit obligation, plan assets and cost associated with the plan in the same way as for any other defined benefit plan.

When sufficient information is not available to use defined benefit accounting for a plan, that is a defined benefit plan, the municipality account for the plan as if it was a defined contribution plan.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Policies**

---

#### **1.15 Employee benefits (continued)**

##### **Post-employment benefits: Defined contribution plans**

Defined contribution plans are post-employment benefit plans under which an entity pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

When an employee has rendered service to the municipality during a reporting period, the municipality recognise the contribution payable to a defined contribution plan in exchange for that service:

- as a liability (accrued expense), after deducting any contribution already paid. If the contribution already paid exceeds the contribution due for service before the reporting date, an entity recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the contribution in the cost of an asset.

Where contributions to a defined contribution plan do not fall due wholly within twelve months after the end of the reporting period in which the employees render the related service, they are discounted. The rate used to discount reflects the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the obligation.

##### **Post-employment benefits: Defined benefit plans**

Defined benefit plans are post-employment benefit plans other than defined contribution plans.

The municipality recognises the net total of the following amounts in surplus or deficit, except to the extent that another Standard requires or permits their inclusion in the cost of an asset:

- current service cost;
- interest cost;
- the expected return on any plan assets and on any reimbursement rights;
- actuarial gains and losses;
- past service cost;
- the effect of any curtailments or settlements; and
- the effect of applying the limit on a defined benefit asset (negative defined benefit liability).

The municipality uses the Projected Unit Credit Method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Projected Unit Credit Method (sometimes known as the accrued benefit method pro-rated on service or as the benefit/years of service method) sees each period of service as giving rise to an additional unit of benefit entitlement and measures each unit separately to build up the final obligation.

In determining the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost, an entity shall attribute benefit to periods of service under the plan's benefit formula. However, if an employee's service in later years will lead to a materially higher level of benefit than in earlier years, an entity shall attribute benefit on a straight-line basis from:

- the date when service by the employee first leads to benefits under the plan (whether or not the benefits are conditional on further service); until
- the date when further service by the employee will lead to no material amount of further benefits under the plan, other than from further salary increases.

Actuarial valuations are conducted on an annual basis by independent actuaries separately for each plan. The results of the valuation are updated for any material transactions and other material changes in circumstances (including changes in market prices and interest rates) up to the reporting date.

##### **Actuarial assumptions**

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Policies**

---

#### **1.15 Employee benefits (continued)**

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
- those changes were enacted before the reporting date; or
- past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

#### **1.16 Provisions and contingencies**

Provisions are recognised when:

- the economic entity has a present obligation as a result of a past event;
- it is probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; and
- a reliable estimate can be made of the obligation.

The amount of a provision is the best estimate of the expenditure expected to be required to settle the present obligation at the reporting date.

Where the effect of time value of money is material, the amount of a provision is the present value of the expenditures expected to be required to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the economic entity settles the obligation. The reimbursement is treated as a separate asset. The amount recognised for the reimbursement does not exceed the amount of the provision.

Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. Provisions are reversed if it is no longer probable that an outflow of resources embodying economic benefits or service potential will be required, to settle the obligation.

Where discounting is used, the carrying amount of a provision increases in each period to reflect the passage of time. This increase is recognised as an interest expense.

A provision is used only for expenditures for which the provision was originally recognised.

Provisions are not recognised for future operating deficits.

If an entity has a contract that is onerous, the present obligation (net of recoveries) under the contract is recognised and measured as a provision.

A contingent liability is:

- a possible obligation that arises from past events, and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or
- a present obligation that arises from past events but is not recognised because it is not probable that an outflow of resources embodying economic benefits or service potential will be required to settle the obligation; or the amount of the obligation cannot be measured with sufficient reliability.

The municipality does not recognise a contingent liability but discloses details of any contingencies in the notes to the financial statements, unless the possibility of an outflow of resources embodying economic benefits or service potential is remote. Contingencies are disclosed in note 40.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Policies**

---

#### **1.17 Commitments**

Items are classified as commitments when an entity has committed itself to future transactions that will normally result in the outflow of cash.

Disclosures are required in respect of unrecognised contractual commitments.

Commitments for which disclosure is necessary to achieve a fair presentation should be disclosed in a note to the financial statements, if both the following criteria are met:

- Contracts should be non-cancellable or only cancellable at significant cost (for example, contracts for computer or building maintenance services); and
- Contracts should relate to something other than the routine, steady, state business of the entity – therefore salary commitments relating to employment contracts or social security benefit commitments are excluded.

#### **1.18 Revenue from exchange transactions**

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

#### **Measurement**

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

#### **Sale of goods**

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the economic entity has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the economic entity retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the economic entity; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

#### **Rendering of services**

Service charges relating to electricity and water are based on consumption. Meters are read on a monthly basis and revenue is recognized when invoiced. Provisional estimates of consumption are made monthly when meter readings have not been performed and are based on the consumption history. The provisional estimates of consumption are recognized as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period when meters have been read. These adjustments are recognized as revenue in the invoicing period.

Revenue arising from application of the approved tariff or charges is recognised when the relevant service is rendered by applying the relevant authorised tariff. This includes the issuing of licenses and permits.

Service charges relating to solid waste, sanitation and sewerage are levied monthly in terms of the approved tariffs.

#### **Interest**

Revenue arising from the use by others of entity assets yielding interest, royalties and dividends or similar distributions is recognised when:

- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- The amount of the revenue can be measured reliably.

Interest is recognised, in surplus or deficit, using the effective interest rate method.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Accounting Policies**

---

#### **1.18 Revenue from exchange transactions (continued)**

Service fees included in the price of the product are recognised as revenue over the period during which the service is performed.

#### **1.19 Revenue from non-exchange transactions**

Revenue from non-exchange transactions refers to transactions where the municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

##### **Recognition**

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

##### **Measurement**

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

##### **Rates (including collection charges and penalty interest)**

Revenue from property rates is recognised when the legal entitlement to this revenue arises. Collection charges are recognised when such amounts are legally enforceable. Penalty interest on unpaid rates is recognised on a time proportionate basis.

Rebates are respectively granted, to owners of land on which not more than two dwelling units are erected provided that such dwelling units are solely used for residential purposes. Additional relief is granted to needy, aged and/or disabled owners, based on income.

Assessment rates income is recognised once a rates account has been issued to ratepayers. Adjustments or interim rates are recognised once the municipal Valuer has valued the change to properties.

##### **Transfers**

Apart from Services in kind, which are not recognised, the municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

The municipality recognises an asset in respect of transfers when the transferred resources meet the definition of an asset and satisfy the criteria for recognition as an asset.

Transferred assets are measured at their fair value as at the date of acquisition.

##### **Fines**

Fines are recognised as revenue when the receivable meets the definition of an asset and satisfies the criteria for recognition as an asset.

Assets arising from fines are measured at the best estimate of the inflow of resources to the municipality.

Where the municipality collects fines in the capacity of an agent, the fine will not be revenue of the collecting entity.

# **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

## **Accounting Policies**

---

### **1.19 Revenue from non-exchange transactions (continued)**

#### **Bequests**

Bequests that satisfy the definition of an asset are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality, and the fair value of the assets can be measured reliably.

#### **Gifts and donations, including goods In-kind**

Gifts and donations, including goods In-kind, are recognised as assets and revenue when it is probable that the future economic benefits or service potential will flow to the municipality and the fair value of the assets can be measured reliably.

### **1.20 Borrowing costs**

It is inappropriate to capitalise borrowing costs when, and only when, there is clear evidence that it is difficult to link the borrowing requirements of an entity directly to the nature of the expenditure to be funded i.e. capital or current.

Borrowing costs are recognised as an expense in the period in which they are incurred.

### **1.21 Comparative figures**

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

### **1.22 Unauthorised expenditure**

Unauthorised expenditure is expenditure that has not been budgeted for, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No. 66 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

### **1.23 Fruitless and wasteful expenditure**

Fruitless expenditure means expenditure which was made in vain and would have been avoided had reasonable care been exercised.

All expenditure relating to fruitless and wasteful expenditure is recognised as an expense in the statement of financial performance in the year that the expenditure was incurred. The expenditure is classified in accordance with the nature of the expense, and where recovered, it is subsequently accounted for as revenue in the statement of financial performance.

### **1.24 Irregular expenditure**

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No. 66 of 2003), the Municipal Systems Act (Act No. 32 of 2000), and the Public Office Bearer Act (Act No. 29 of 1998) or is in contravention of the economic entity's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

### **1.25 Conditional grants and receipts**

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the municipality has complied with any of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised. The liability is transferred to revenue as and when the conditions attached to the grants are met. Grants without any conditions attached are recognised as revenue when the asset is recognised.

### **1.26 Segmental information**

Segmental information on property, plant and equipment, as well as income and expenditure, is set out in Appendices C and D, based on the International Government Financial Statistics classifications and the budget formats prescribed by National Treasury. The economic entity operates solely in its area of jurisdiction as determined by the Demarcation Board.

### **Accounting Policies**

---

#### **1.27 Budget Information**

Economic Entity are typically subject to budgetary limits in the form of appropriations or budget authorisations (or equivalent), which is given effect through authorising legislation, appropriation or similar.

General purpose financial reporting by economic entity shall provide information on whether resources were obtained and used in accordance with the legally adopted budget.

The approved budget is prepared on a accrual basis and presented by functional classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 2014/07/01 to 2015/06/30.

The budget for the economic entity includes all the entities approved budgets under its control.

The unaudited consolidated financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

Comparative information is not required.

#### **1.28 Related parties**

Management are those persons responsible for planning, directing and controlling the activities of the economic entity, including those charged with the governance of the economic entity in accordance with legislation. In instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the economic entity.

Only transactions with related parties not at arm's length or not in the ordinary course of business are disclosed.

#### **1.29 VAT**

The municipality accounts for VAT on the payment basis. Output VAT is only payable as and when the purchase consideration is received and input tax can only be claimed as and when payments are made.

#### **1.30 Change in accounting policies, estimates and errors**

Changes in accounting policies that are effected by management are applied retrospectively in accordance with GRAP 3 requirements, except to the extent that is impracticable to determine the period-specific effects or the cumulative effect of the change in policy. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable.

Changes in accounting estimates are applied prospectively. Details of changes in estimates are disclosed in the notes to the financial statements where applicable.

Correction of errors is applied retrospectively in the period in which the error has occurred except to the extent that it is impracticable to determine the period-specific effects or the cumulative effect of the error. In such cases the municipality shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable. Refer to note 59 of the financial statements for details of corrections of errors recorded during the period under review.

#### **1.31 Amended disclosure policy**

Amendments to accounting policies are reported as and when deemed necessary based on the relevance of any such amendment to the format and presentation of the financial statements. The principal amendments to matters disclosed in the current financial statements include fundamental errors.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

## **Notes to the Consolidated Financial Statements**

### **2. New standards and interpretations**

#### **2.1 Standards and interpretations not yet effective or relevant**

The following standards and interpretations have been published and are mandatory for the economic entity's accounting periods beginning on or after 01 July 2015 or later periods but are not relevant to its operations:

##### **GRAP 20: Related parties**

The objective of this standard is to ensure that a reporting entity's consolidated financial statements contain the disclosures necessary to draw attention to the possibility that its financial position and surplus or deficit may have been affected by the existence of related parties and by transactions and outstanding balances with such parties.

An entity that prepares and presents financial statements under the accrual basis of accounting (in this standard referred to as the reporting entity) shall apply this standard if:

- identifying related party relationships and transactions;
- identifying outstanding balances, including commitments, between an entity and its related parties;
- identifying the circumstances in which disclosure of the items in (a) and (b) is required; and
- determining the disclosures to be made about those items.

This standard requires disclosure of related party relationships, transactions and outstanding balances, including commitments, in the consolidated and separate financial statements of the reporting entity in accordance with the Standard on GRAP on Consolidated and Separate Financial Statements. This standard also applies to individual consolidated financial statements.

Disclosure of related party transactions, outstanding balances, including commitments, and relationships with related parties may affect users' assessments of the financial position and performance of the reporting entity and its ability to deliver agreed services, including assessments of the risks and opportunities facing the entity. This disclosure also ensures that the reporting entity is transparent about its dealings with related parties.

The standard states that a related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control. As a minimum, the following are regarded as related parties of the reporting entity:

- A person or a close member of that person's family is related to the reporting entity if that person:
  - has control or joint control over the reporting entity;
  - has significant influence over the reporting entity;
  - is a member of the management of the entity or its controlling entity.
- An entity is related to the reporting entity if any of the following conditions apply:
  - the entity is a member of the same economic entity (which means that each controlling entity, controlled entity and fellow controlled entity is related to the others);
  - one entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of an economic entity of which the other entity is a member);
  - both entities are joint ventures of the same third party;
  - one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
  - the entity is a post-employment benefit plan for the benefit of employees of either the entity or an entity related to the entity. If the reporting entity is itself such a plan, the sponsoring employers are related to the entity;
  - the entity is controlled or jointly controlled by a person identified in (a); and
  - a person identified in (a)(i) has significant influence over that entity or is a member of the management of that entity (or its controlling entity).

The standard furthermore states that related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

The standard elaborates on the definitions and identification of:

- Close member of the family of a person;
- Management;
- Related parties;
- Remuneration; and
- Significant influence

The standard sets out the requirements, inter alia, for the disclosure of:

- Control;
- Related party transactions; and

**Greater Tzaneen Municipality**  
Consolidated Financial Statements for the year ended 30 June 2016

**Notes to the Consolidated Financial Statements**

**2. New standards and interpretations (continued)**

- Remuneration of management

The effective date of the standard is for years beginning on or after 01 April 2016.

The economic entity does not envisage the adoption of the standard until such time as it becomes applicable to the economic entity's operations.

It is unlikely that the standard will have a material impact on the municipality's consolidated financial statements.

**GRAP32: Service Concession Arrangements: Grantor**

The objective of this Standard is: to prescribe the accounting for service concession arrangements by the grantor, a public sector entity.

It furthermore covers: Definitions, recognition and measurement of a service concession asset, recognition and measurement of liabilities, other liabilities, contingent liabilities, and contingent assets, other revenues, presentation and disclosure, transitional provisions, as well as the effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The economic entity does not envisage the adoption of the standard until such time as it becomes applicable to the economic entity's operations.

It is unlikely that the standard will have a material impact on the municipality's consolidated financial statements.

**GRAP108: Statutory Receivables**

The objective of this Standard is: to prescribe accounting requirements for the recognition, measurement, presentation and disclosure of statutory receivables.

It furthermore covers: Definitions, recognition, derecognition, measurement, presentation and disclosure, transitional provisions, as well as the effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The economic entity does not envisage the adoption of the standard until such time as it becomes applicable to the economic entity's operations.

It is unlikely that the standard will have a material impact on the municipality's consolidated financial statements.

**IGRAP17: Service Concession Arrangements where a Grantor Controls a Significant Residual Interest in an Asset**

This Interpretation of the Standards of GRAP provides guidance to the grantor where it has entered into a service concession arrangement, but only controls, through ownership, beneficial entitlement or otherwise, a significant residual interest in a service concession asset at the end of the arrangement, where the arrangement does not constitute a lease. This Interpretation of the Standards of GRAP shall not be applied by analogy to other types of transactions or arrangements.

A service concession arrangement is a contractual arrangement between a grantor and an operator in which the operator uses the service concession asset to provide a mandated function on behalf of the grantor for a specified period of time. The operator is compensated for its services over the period of the service concession arrangement, either through payments, or through receiving a right to earn revenue from third party users of the service concession asset, or the operator is given access to another revenue-generating asset of the grantor for its use.

Before the grantor can recognise a service concession asset in accordance with the Standard of GRAP on Service Concession Arrangements: Grantor, both the criteria as noted in paragraph .01 of this Interpretation of the Standards of GRAP need to be met. In some service concession arrangements, the grantor only controls the residual interest in the service concession asset at the end of the arrangement, and can therefore not recognise the service concession asset in terms of the Standard of GRAP on Service Concession Arrangements: Grantor.

A consensus is reached, in this Interpretation of the Standards of GRAP, on the recognition of the performance obligation and the right to receive a significant interest in a service concession asset.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Notes to the Consolidated Financial Statements**

---

#### **2. New standards and interpretations (continued)**

The effective date of the standard is not yet set by the Minister of Finance.

The economic entity does not envisage the adoption of the standard until such time as it becomes applicable to the economic entity's operations.

It is unlikely that the standard will have a material impact on the municipality's consolidated financial statements.

#### **GRAP109: Accounting by Principals and Agents\***

The objective of this Standard is to outline principles to be used by the municipality to assess whether it is party to a principal-agent arrangement, and whether it is a principal or an agent in undertaking transactions in terms of such an arrangement. This standard does not introduce new recognition or measurement requirements for revenue, expenses, assets and/or liabilities that result from principal-agent arrangements. The standard does not however provide guidance on whether revenue, expenses, assets and/or liabilities should be recognised by an agent or a principal, as well as prescribe what information should be disclosed when an entity is a principal or agent.

An entity that prepares and presents financial statements under the accrual basis of accounting shall apply this standard in determining whether it is a principal or an agent arrangement. When an entity is party to a principal-agent arrangement, it shall apply the principles in this standard to assess whether it is a principal or a agent before applying other standards of GRAP dealing with the recognition and measurement of revenue, expenses, assets and/or liabilities.

It furthermore covers the definition of a principal-agent arrangement, binding arrangement, assessing which entity benefits from transactions with third parties, recognition and measurement of revenue and expenses as a principal or agent as well as assets and liabilities as a principal or agent, presentation, disclosure by agents and principals, transitional provisions and effective date.

The effective date of the standard is not yet set by the Minister of Finance.

The municipality expects to adopt the standard for the first time when the Minister set the effective date for the standard.

It is unlikely that the standard will have a material impact on the municipality's consolidated financial statements.

Consolidated Financial Statements for the year ended 30 June 2015

### Notes to the Consolidated Financial Statements

Figures in Rand	Economic entity		Controlling entity	
	2015	2014	2015	2014
<b>6. Receivables from exchange transactions (continued)</b>				
<b>Credit quality of receivables from exchange transactions</b>				
Trade and other debtors are payable within 30 days. This credit period granted is considered to be consistent with the terms used in the public sector, through established practices and legislation. Discounting of trade and other receivables on initial recognition is not deemed necessary.				
Concentrations of credit risk with respect to trade receivables are limited due to the municipality's large number of customers. The municipality's historical experience in collection of trade receivables falls within recorded allowances. Due to these factors, management believes that no additional risk beyond amounts provided for collection losses is inherent in the municipality's trade receivables.				
<b>7. Receivables from non-exchange transactions</b>				
Fines	2 553 010	423 657	2 553 010	423 657
<b>Receivables from non-exchange transactions</b>				
The Accounting Standard Board amended GRAP 1 applying the Probability Test on the Initial Recognition of Revenue to include revenue from non-exchange transactions. This amendment is applicable to municipalities from 1 July 2013. GRAP 1 indicates that entities should not consider the probability of non-payment on the initial recognition of revenue. This should be considered as a subsequent event when assessing impairment.				
Fine revenue of all fines issued during the current year amounted to R 39 561 187. The outstanding fines were assessed for impairment based on the payment history of fines issued and measures put in place to recover the outstanding amounts.				
<b>Credit quality of receivables from non-exchange transactions</b>				
Traffic fines are payable as determined by the fine. The credit period granted is considered to be consistent with established practices and legislation.				
The municipality's historical experience in collection of traffic fines falls within recorded allowances. Due to these factors, management believes that no additional risk beyond amounts provided for collection losses is inherent in the municipality's receivables from non-exchange transactions.

**Consumer debtors pledged as security**

No portion of accounts receivable was pledged as security for any financial liabilities.

**Credit quality of consumer debtors**

The credit quality of consumer debtors that are neither past nor impaired can be assessed by reference to historical information about counterparty default rates:

Consumer debtors are payable within 30 days. This credit period granted is considered to be consistent with the terms used in the public sector, through established practices and legislation. Discounting of consumer debtors on initial recognition is not deemed necessary.

Concentrations of credit risk with respect to consumer debtors are limited due to the municipality's large number of customers. The municipality's historical experience in collection of consumer debtors falls within recorded allowances. Due to these factors, management believes that no additional risk beyond amounts provided for collection losses is inherent in the municipality's consumer debtors.

## Greater Tzaneen Municipality

Consolidated Financial Statements for the year ended 30 June 2015

### Notes to the Consolidated Financial Statements

Figures in Rand	Economic entity		Controlling entity	
	2015	2014	2015	2014

#### 8. Consumer debtors (continued)

##### Fair value of consumer debtors

The fair value of accounts receivable approximates their carrying amounts.

##### Consumer debtors

No security is held for any of the accounts receivable.

##### Consumer debtors impaired

As of 30 June 2015, consumer debtors of R 163 056 873 (R 146 678 666) were impaired and provided for.

Indigent debtors to the amount of R 4771 482 (2014: R 3 292 112) have been written off as uncollectable in the current year.

These amounts best represent the maximum exposure to credit risk at the end of the reporting period without taking account of any collateral held or other credit enhancements.

##### Reconciliation of allowance for impairment of consumer debtors

Opening balance	146 678 666	131 941 827	146 678 666	131 941 827
Allowance for impairment	21 151 689	18 026 951	21 151 689	18 026 951

##### Pledged as security

No investment properties was pledged as security for liabilities.

A register containing the information required by section 63 of the Municipal Finance Management Act is available for inspection at the registered office of the municipality.

##### Details of valuation

The Greater Tzaneen Municipality valuation is based on the valuation roll and is reviewed every four years. The last valuation came into effect on 1 July 2013. Interim valuations are processed on a monthly basis to take into account changes in individual property values due to alterations and subdivisions.

#### Annuity loan - Standard Bank

This loan has been split into two allocations of R21 011 000 and R13 281 000 and was taken up on 30 June 2012. These loans bear interest at rates of 11,8% and 10,98% respectively and will be fully redeemed on 30 June 2019 and 30 June 2017 respectively.

#### Annuity loan - ABSA

This loan has been split into two allocations of R25 140 000 and R9 640 000 and was taken up on 15 August 2010. These loans bear interest at rates of 10,82% and 6,78% respectively and will be fully redeemed on 31 July 2025 and 31 July 2015 respectively.

#### Annuity loan - DBSA

A loan of R41 000 000 of which R 35 010 850 has been allocated during the 2010 / 2011 financial year was taken up to finance capital projects. This loan bears interest at a rate of 6,78% per annum and will be fully redeemed on 31 October 2030.

#### Annuity loan - INCA

The loan has been taken up to finance the purchase of land. It bears interest at a rate of 12,5% per annum and will be fully redeemed on 31 December 2018.

#### Loan stock: DBSA (Excelerator 1 000 investment)

An investment of R855 619 has been made with Liberty to repay a loan of R15 000 000 on maturity date. The loan bears interest at a variable rate and will be redeemed on 30 September 2019.

#### Undrawn borrowings

There were no undrawn borrowing facilities that were available for future activities or to settle capital commitments at 30 June 2015.

None of the loans are secured by any fixed or movable assets of the Greater Tzaneen Municipality.

The municipality did not default on any of the borrowings in respect of capital or interest portions.

No terms attached to the financial liabilities were re-negotiated.

## Greater Tzaneen Municipality

Current liabilities	2 488 580	2 614 676	2 488 580	2 614 676
	5 964 553	5 774 651	5 964 553	5 774 651

##### Provision for rehabilitation of landfill site

The provision for rehabilitation of landfill sites relates to the legal obligation to rehabilitate landfill sites used for waste disposal. It is calculated as the present value of the future obligation, discounted at 10% over an average period of 20 years. The due date of this provision is June 2027.

##### Provision for performance bonuses

Performance bonuses accrue to Section 57 managers and managers on an annual basis subject to certain conditions. The provision is the actual amount due at the reporting date to staff. Performance bonuses are paid one year in arrears as the assessment of eligible employees had not taken place at the end of the reporting period. Performance bonuses are measured at face value as it is expected that these would be paid shortly after the financial year end once performance evaluations have been completed.

Valuations on land and buildings are performed every four years. The last valuation came into effect on 1 July 2013. In interim valuations are processed on a monthly basis to take into account changes in individual property values due to alterations and subdivisions. The same rate is applied on different categories of property and improvement valuations to determine assessment rates. Rebates are granted on various categories of properties. Interest at prime rate plus 1% is levied on outstanding rates and the prime rate of ABSA applies.

The grant is used for rural waste removal.

#### Changes in level of government grants

Based on the allocations set out in the Division of Revenue Act, no significant changes in the level of government grant funding are expected over the forthcoming 3 financial years.

All grant funding destined for the Municipality in terms of the annual Division of Revenue Act, with the exception of R 16 460 684, due to poor performance on the NDPG allocation, has been received.

#### 25. Donations received

Greater Tzaneen Municipality received a donation of roads as per Gazette number 2372 of 13 June 2014. Due to absence of the cost information on the donated roads, these roads were accounted for at deemed cost / fair value of R 155 300 000 in line with the Municipality's Assets Management policy and GRAP.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Notes to the Consolidated Financial Statements**

Figures In Rand	Economic entity		Controlling entity	
	2015	2014	2015	2014

#### **40. Contingencies (continued)**

##### **Contingent liabilities**

Mr A. Mushwana was suspended with pay, thereafter dismissed with effect from 18 May 2015 as imposed by the presiding officer after having followed due disciplinary processes; and the appeal hearing is in progress.

No provision has been made based on the substantive evidence at hand, the probability of the case being in GTEDA's favour is high.

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Notes to the Consolidated Financial Statements**

#### **41. Related parties**

##### **Relationships**

Municipal Manager	Vacant
Chief Financial Officer	NM Llon
Director Community Services	OZ Mkhomtho
Director Civil Engineering	DS Malatji
Director Corporate Services	Vacant
Director Electrical Engineering	P van den Heever
Councillors	Refer to note 29 for list of councillors

All Councillors have disclosed their interest in related parties and no one has the ability to control or exercise significant influence over the Council in making financial and operational decisions.

During the financial year no Councillor or Official had any interest in related parties and no one could control or influence Council in making financial or operational decisions.

##### **Loans granted to related parties**

In terms of the MFMA the municipality may not grant loans to its councillors, management, staff and public with effect from 1 March 2004. Loans granted prior to this date as well as stand sale arrangement are disclosed in note 4 to the annual financial statements.

##### **GTEDA**

GTEDA is a Municipality Entity established by Greater Tzaneen Municipality and performs the function consistent with that of an entity and can not control or influence council in making financial or operational decisions.

##### **Mopani District Municipality**

Greater Tzaneen Municipality acts as the service provider for Mopani District Municipality with regards to the water and sewer services. Mopani District Municipality is the water and sewer service authority and those services reflect in their records. Mopani District Municipality has no control over the council of Greater Tzaneen Municipality and can not influence council in making financial or operational decisions.

The municipality had no other related party transactions or balances during the financial year outside of the contractual remuneration of senior management.

There are no share based payments.

##### **Industrial Development Corporation (IDC)**

Which is a major funder of GTEDA.

The major stakeholders of GTEDA is Limpopo Economic Development Agency, the former Limpopo Agri-Business Development Corporation (LADC) and a strategic partner in the Makgoba Tea Estates.

##### **Related party transactions**

###### **Grants received from related parties**

Industrial Development Corporation	3 000 000	3 000 000
------------------------------------	-----------	-----------

Refer to note 27 for detail of remuneration paid to Section 57 Managers and to note 29 for remuneration paid to Councillors.

##### Liquidity risk

Liquidity risk is the risk encountered by an entity in the event of difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset.

The municipality's risk to liquidity is a result of the funds available to cover future commitments. The municipality manages liquidity risk through an ongoing review of future commitments and credit facilities. The municipality's policy on counterpart credit exposures ensures that only counterparties of a high credit standing are used for the investments of any excess cash.

Cash flow forecasts are prepared and adequate utilised borrowing facilities are monitored.

The table below analyses the economic entity's financial liabilities into relevant maturity groupings based on the remaining period of the statement of financial position to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances as the impact of discounting is not significant at 30 June 2015.

##### Economic entity

## **Greater Tzaneen Municipality**

Consolidated Financial Statements for the year ended 30 June 2015

### **Notes to the Consolidated Financial Statements**

#### **42. Risk management(continued)**

##### **Credit risk**

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Credit risk consists mainly of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counter-party.

Potential concentrations of credit risk consist mainly of investments, loans, trade receivables and other receivables, short-term investment deposits and cash and cash equivalents.

The municipality limits its counterparty exposures from its money market investment operations by only dealing with well-established financial institutions of high credit standing. The credit exposure to any single counterparty is managed by setting transaction/exposure limits, which are included in the municipality's Investments Policy.

Trade receivables comprise of a large number of ratepayers, dispersed across different industries and geographical areas. Ongoing credit evaluations are performed on the financial condition of these customers. Trade receivables are presented net of an allowance for impairment and where appropriate, credit limits are adjusted.

Credit risk pertaining to trade and other debtors is considered to be moderate due to the diversified nature of debtors and immaterial nature of individual balances. In the case of consumer debtors the municipality effectively has the right to terminate services to customers.

In the case of customers whose accounts become in arrears, it is endeavoured to collect such accounts by "levying of interest charges", "demand for payment", "restriction of services" and, as a last resort, "handed over for collection", whichever procedure is applicable in terms of Council's Credit Control and Debt Collection Policy.

Non-current Receivables and Other Receivables are collectively evaluated annually at reporting date for impairment or discounting. A report on the various categories of customers is drafted to substantiate such evaluation and subsequent impairment / discount, where applicable.

No cash and cash equivalents were pledged as security for financial liabilities and no restrictions were placed on the use of any cash and cash equivalents for the period under review. Although the credit risk pertaining to cash and cash equivalents is considered to be low, the maximum exposure is disclosed below.

The maximum credit and interest risk exposure in respect of the relevant financial instruments is as follows:

Financial assets exposed to credit risk at year end were as follows:

Financial Instrument	Economic entity - 2015	Economic entity - 2014	Controlling entity - 2015	Controlling entity - 2014
Receivables from exchange transactions	188 429 651	188 057 714	188 429 651	188 057 714
Receivables from non-exchange transactions	2 553 010	423 657	2 553 010	423 657
Cash and cash equivalents	28 404 636	24 377 968	27 877 490	23 822 041
Consumer debtors	115 629 701	98 092 370	115 629 701	98 092 370
Other financial assets	9 041 278	8 005 170	9 041 278	8 005 170

The method for determining the credit quality of the different financial instruments are disclosed in their individual notes.

##### **Market risk**

###### **Interest rate risk**

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

**Greater Tzaneen Municipality**  
Consolidated Financial Statements for the year ended 30 June 2015

**Notes to the Consolidated Financial Statements**

**42. Risk management (continued)**

The municipality is exposed to interest rate risk on its investments and long term borrowings.

A sensitivity analysis is done by the municipality on a continuous basis to determine its potential exposure to interest rate charges. Different scenarios are simulated which include renewal of current position and alternative financing. Based on those scenarios the municipality calculates the impact that a change in interest rate will have on the surplus / deficit for the year. These scenarios are only simulated for liabilities which constitute the majority of interest bearing liabilities.

This risk is managed by investing in investments with different maturity dates. This enables the municipality to re-allocate some of the investments in the event of major fluctuations in interest rates. Borrowings issued at variable rates expose the municipality to cash flow interest rate risk. Borrowings at fixed rates expose the municipality to fair value interest rate risk.

**Price risk**

The effect of any price risk in the foreseeable future is regarded as minimal given the fact that amounts receivable from the municipality's customers are levied in terms of the relevant statutes. It is not anticipated that given the nature of the municipality's business, changes in the market prices will have a material impact on the trading results of the municipality.

**Controlling entity**

Risk is managed on an ongoing basis.

There has been no change, since the previous financial year to the municipality exposure to market risks on the manner which it manages and measures the risk.

**43. Going concern**

The consolidated financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

The ability of the municipality to continue as a going concern is dependent on a number of factors. The most significant of these is that the accounting officer continue to procure funding for the ongoing operations for the municipality.

**44. Unauthorised expenditure**

	96 082 486	93 740 995	96 082 486	83 740 995
Unauthorised expenditure for the year (overspending of budget)	26 387 498	27 651 084	26 387 498	27 651 084
Blockfication Grant overspend	-	4 033 488	-	4 033 488
EPWP Grant overspend	-	11 161	-	11 161
EU Grant overspend	-	646 768	-	646 768
Unauthorised expenditure condoned	(96 082 486)	-	(96 082 486)	-
Unauthorised expenditure awaiting authorisation	26 387 498	96 082 486	26 387 498	96 082 486

Unauthorised expenditure for the year is as a result of overspending of the approved budget.

No criminal or disciplinary steps have been taken as a consequence of above expenditure.

The unauthorised expenditure has been tabled to Council and is investigated by a committee of Council.

**Reconciliation of the tax expense**

Reconciliation between applicable tax rate and average effective tax rate.

Applicable tax rate	28,00 %	28,00 %	- %	- %
---------------------	---------	---------	-----	-----

Greater Tzaneen Economic Development Agency receives the majority of income from grants which are exempt from Income tax, the entity has applied for a tax exemption certificate from SARS. The entity provided for tax on the income that is not considered by management to be exempt.

**60. Change in estimate**

**Property, plant and equipment**

The municipality has reassessed the useful lives of property, plant and equipment which resulted in certain assets rearing useful lives to change from ten (10) to eleven (11) years on average. The effect of the change in accounting estimates has resulted in a decrease of depreciation amounting to R 7 673 371 for the current period. The effect on future periods could not reasonably be determined.

The change in estimates affected the following classes of assets:

- Infrastructure assets
- Community assets
- Other assets
